

# Unified Functional Testing

Course Overview

# Course Objectives

By the end of this Course you will be able to:

- Create basic scripts from a manual test case.
- Enhance basic tests with synchronization and verification.
- Parameterize tests to run with multiple sets of data.
- Create and reuse modular actions.
- Enhance the scripts using VBScript capabilities
- Access external resources
- Debug and use error handling in the scripts

# Agenda

1. Course Overview
2. Introduction to Test Automation
3. Prepare To Record
4. UFT Overview
5. Creating a Basic Test
6. Object Repository
7. Synchronization
8. Alternative Record Types
9. Check Points
10. Debugging
11. Adding Programming Statements Without Recording

## Agenda – Cont'

- 12. Parameterizing
- 13. Actions
- 14. VBScript
- 15. Procedures
- 16. DB Check Points
- 17. Dynamic Objects
- 18. Dynamic Data
- 19. Handle Exceptions
- 20. External Data
